

### **Question 11: What would you change about Place Riel?**

70's style look.

a designated place to sit and visit so it is not so crowded to walk through

a few more food services

A greater amount of variety of food services

A highspeed Elevator like in the London Underground.

A little more sitting area, since whenever you got there it is always packed.

A more nutritious fast food venue in Lower Place would be nice, rather than A&W.

a sit down restaurant that has fast service

A subway would be sweet

a total facelift to modernize the look. It is very dated and scrubby looking. Some more businesses in Upper Place Riel would make things more accessible and visible to people.

a touch more lighting in the area in front of the doors where all the couches are, the windows don't let in enough light there. and in lower place, maybe change the layout cuz there are so many people and it's hard to get thru cuz of people traffic

A wider variety of food options.

Add a bit more variety to the places you could get food. More seating space

Add a computer lab and increase eating areas.

add more food choices and area to sit

Add more lighting

Add more space to sit/eat/talk

add more tables for people to be able to eat instead of standing

Add some computers and tables

all of the above and make it more bright, welcoming. give students a place they want to go to rest and relax, get daily tasks done and enjoy study time.

An eating area/more eating/studying area would be nice. Sometimes when you go down there to eat, there's no place to sit.

appearance, availability (times available to students, should be open 24-7), atmosphere

Area behind the escalators needs to be fixed

Atmosphere

Automatic doors

bathrooms in upper place

Bathrooms in upper place. When you're waiting for the bus there's nowhere to run to quickly!

Better Chairs.

Better escalators

Better Escalators

Better floor plan to accommodate the traffic through the area each day.

Better lighting

better lighting

Better lighting downstairs, more plants, better use of space. Make it sustainable(solar or wind, green roof, low flow toilets etc). An outdoor balcony on the second floor with plants and tables would be nice for warmer days.

better lighting, natural light

Better lighting... seems really dark all the time

Better location of elevators

Better seating in upper Place

better seats removing those massage seats so idiots don't sit in them for 45min straight and wonder where the beeping is coming from  
better tables and chair.

Better traffic flow.

better use of open space. more emphasis on cleanliness. better pedestrian traffic movement

better use of space, a walk through place rather than just a path that cuts through valuable space and could be used better

bigger

Bigger

Bigger

bigger

bigger and more seating space to eat/visit

bigger eating area

bigger food court - more selection in eating open it up so people can move freely

bigger, more food choices

Bigger. More seating.

Bigger. Upgrades good.

Brighten it up, it is too dark.

brighter

Brighter and more appealing

Brighter lighting.

brighter, more modern.

brighter, more open, healthier options for food

Brighter, more up to date look, more seating areas and a more intimate feel.

brighter, more windows, and more couches

Brighter...more windows for natural light Warm colors to make it comfortable Please to not make Place Riel look like a mall

Bring back the Place Riel Theatre.

card swipe into rez tunnel from upper place, and leave the doors between lower place and the arts tunnel open after midnight so rez ppl don't have to walk in the cold

chairs are dirty looking from stains (the ones by doors in upper)

Change the decor to make it less dated, brighten it up, more skylights and plants, something that the campus can be proud of.

Something more along the lines of the Ag building or the PAC.

Clean the chairs Or don't have chairs that are made of a material...

They're growse.

Cleaner facility and more selection and better chairs in certain areas.  
cleaner seats in upper place. The seats that are currently there are disgusting!

Cleaner, more quiet space, more inviting.

cleanliness

colors, seating for buses, the way that student traffic gets congested both in upper place by the escalators, and in lower place between the A&W and the sitting areas.

Colour... brown is depressing NO ESCALATORS

Connect it to buildings like physics or Biology/Geology.

Consistently working escalators.

Create a larger front lobby so you can easily wait for buses

Decor

decor change. comfier seating and way more seating! more couches, not metal benches!!

direct the flow of traffic better (i.e. walking from Marquis Hall through.

dirty seats at the front

Don't know

Doors in and out of the building should be changed so there is a place to keep warm while waiting for the bus

Drabby colour changed, more comfortable seating

drabness of the tile colour, accessibility (that elevator is generally not large enough for a person in a wheelchair and their companion, and beyond that it smells horrible!!!!)

dunno

either less traffic or space businesses better so it is not so congested

Environmentally Friendly and Sustainable Construction

escalators really aren't necessary

Escalators that work...

escalators, make upper place more inviting, lock the inner doors to place rail so people can still access the outer doors to keep warm ESPECIALLY in winter

everything

Everything is old and outdated, I would update it and maximize tables in cafeteria area.

everything. place rail is a waste of space and electricity.

Expansion of the area, bigger info centre

Fewer escalators, more stairs.

fine as is

Finish the walls. take out the tv's

floor

Food on one level, business on the other.

For the most part I think it is alright the way it is.

Get people out of the tunnel who force handouts on passerbys.

Get rid of A and W and put in like a subway or at least something a bit less greasy.

Get rid of all escalators because they are broken most of the time anyway

get rid of escalators ... they are not necessary and never work anyways.

get rid of the A and W

get rid of the A&W

get rid of the escalator

get rid of the escalators

Get rid of the escalators!!!! They are horribly old and inefficient and a giant waste of energy!! Please ditch them for healthy beautiful stairs to save the environment and our fat asses.

get rid of the stike so it can actually be used

Have a room for main events (such as the poster sale) to be, so that it does not back up traffic for students to and from classes.

Have escalators working all the time

Have more opportunities upstairs so it doesn't look so empty

have more retail areas and put all the atms in the same area

Have more seating because there is not enough during peak hours, as well as more microwaves

Have more seating/meeting areas for students who come there for lunch/hang out with friends.

have more space so its not so cramped

have paintings on walls done by students

Having meeting rooms, quiet areas, microwaves

having the escalators not break down all the time!

having the student services such as getting student loans signed

how traffic flows (design/layout). It can become very congested at times. Having bathrooms in both upper and lower place riel.

I didn't think there was anything wrong with it.

I do not like the seating. It is almost enough, but it is not comfortable and it is so dirty and stained. Those hard plastic chairs are awful, uncomfortable and poor designed. New seating with new coffee tables is much needed.

i dunno

I expect more flowers.

I find it very dark and poor lighting, I would have more lights and natral light

I like it how it is, but change is good too

i like place riel

i said already

I think it is a pretty good place. Perhaps cleaner, more friendlier environment

i think it needs more tables and seating areas. also it needs a facelift in the way it looks as it is quite dreary and outdated looking

I think it needs to be updated and make it for modern day. Many other universities have a better selection of food and retail offerings. This is especially important for students who live in residence

I think that it should be open later

I want it cleaner,like sofa in upper

I would add a much larger eating area.

I would add in more seating, and possibly give it some paint. I would also get rid of the escalators, more stairs increases daily exercise

I would add more seating

i would add more table to sit and eat at

I would change around the seating areas and try to make it so there is more room to fit seating areas. Or make more single and double seating areas so that one person does not take up an entire seating area.

i would change to name... only because i'm never too sure on how to pronounce it

I would create more quiet study spaces

I would create more sitting area and a more inviting atmosphere instead of just a place to walk through.

I would get rid of the escalators.

I would just update it make it look new again.

I would leave it the same. I do not use it very often at all. It would be nice to have maybe another commercial store or another food place but definitely nothing too extravagant.

i would like it to be bigger, it can get crowded

I would like to see better people traffic, it is too congested in Lower Place Riel. Widen the main throughfare.

I would make it more appealing or attractive. Perhaps some sort of vegetation

I would make it more appealing visually.

I would make it more open to improve traffic flow. I would also add more seating to increase the amount of students who can use the space.

I would make Lower Place brighter. It also needs a bigger eating area.

I would maybe place more tables in the food court. Or even just some counters and bar stools that people can sit and eat at so that they don't have to smuggle food into the library to be able to have a place to sit and eat.

I would not change anything except to add more seating.

I would put more couches in there

i would take out the escalators

I would take up LEED Standards

I would want to see an improvement with the amount of healthy choices that are offered. There should be more healthy options. Also, the interior look is gloomy and should reflect a more positive university environment with brighter, and fresher colors.

I'd brighten it up with nicer colours, a lighter floor, and brighter lights. I'd also widen the walk-path at the expense of tables, because it can get traffic-jammed.

I'd have more seating areas.. I always have a hard time finding a decent place to sit.

I'd like there to be more seating areas and for quiet areas because it is always loud down there

I'd make it look nicer.

i'd move the ATM to an area where the lines to use it would not interfere with getting from point A to point B

i'd remove the bank machines in upper place riel and put something else there, although i'm not quite sure what to put there

I'd want it to be more open, not as dungeon looking in lower place. More commercial/retail space to provide options and some healthy competition.

If a second floor is added (as has been rumoured), keep what is now upper place open as it is, with perhaps added waiting spaces.

If it's the main place to hang out (which it seems to be) then why not make it brighter/ more cheerful? It's so ... dingy and dark. It needs more vibrant color. Seriously.

If you want an environment to draw people in it has to be attractive and look comfortable. The gaming area does this, but the main eating lower area does NOT.

I'm traditional so I think it's fine how it is now.

Improve seating. Make them more comfortable (aka the benches around the flowers)

Improve the appearance -- nicer couches, a colour scheme, maybe some art

Improve traffic flow and move food court seating to the same side as the food facilities.

Increase natural light by several thousand percent. It's like a dungeon in there.

increase open hours

Increase the number of services available for students. The structure itself could be more inviting with different decor, more light and larger ceilings. I find myself rarely wanting to sit in Upper Place Riel.

Increase the seating, increase the lighting; it can be pretty dreary.

Increase the aesthetic appeal.

increasing more seats for eating

Is dark with gross furniture (Stained) and too many people.

it does need some repairs, including nicer seats upstairs, fix ups to the seating area downstairs, but that's about it.

it is too far from engineering

It looks too old, needs to be updated, needs to be more modern, should be a few more tv's.

It needs a facelift (make it more modern looking).

it needs a theater.

It needs more comfortable places to socialize without being a customer.

It seems to be cluttered. There are people using it as a passage way to get to the rest of the University and some that like it as a socializing place. Needs to be bigger or spread out better.

it would be more spacious! so you can get to class quicker. is the pharmacy necessary/put to good use?

It would be nice to see a little more daylight. Also, fewer TVs.

Perhaps a more comfortable eating area.

it's a little scattered with no central focus and decent but could be better seating

It's crowded and dark. But it's a central location and in a basement. So what can you do.

Its design, a more circular design, like that of a food court would allow a more efficient flow of traffic and business.

its dingy and depressing.

It's fairly dark and busy, but you can't really change the busy aspect...so the lighting.

It's looks good

It's my favorite place to walk through. Although the Information centre can get pretty packed.

It's not a very attractive or particularly welcoming building - the colours are drab and it seems dark. It kind of looks like the bus depot.

it's outdated. the decorating and design should be renovated.

It's pretty great as it is. The layout is kinda messed sometimes. It's hard to walk around and can be super crowded at points. So better placing of the poles. Haha..

It's too dark, it needs to be brighter and have nicer decor. There also needs to be more seating in the eating areas

Just make it look more modern and bright. It's very dark, and half underground, so not very bright.

just more food and meeting places

Just needs to be bigger. It feels really crowded at times.

just renovate the place

Just to clean it up and make more room for seating. it's difficult to find a spot for lunch

Lack of seating for eating

Larger seating area. If you are to meet with friends it is difficult to find a place to do so.

Layout. Some food services have very little room and they are a hassle to use. More tables. It is nearly impossible to find a place around the busy times.

less 1970s

Less bad fast food, it's not good for out campus in any way...i'm thinking specifically A&W.

Less busy.

less cramped

Lighting-it seems very dark at times

look at the way traffic flows, plan accordingly. don't allow the poster sale in, creates confusion and general waste.

Look more like an atrium.. maybe some trees, a fountain More inviting Better lighting Less sketchy

Lower place is always crowded and Upper place is always empty, do something to get people on upper place.

Lower Place Riel feels cramped during peak times. I would improve traffic flow.

Lower Place Riel is in need of better lighting. This makes it very gloomy and less comfortable to spend time in.

Lower Place Riel is rather dark and dingy feeling and I never spend time down there in the seating area. I would somehow lighten the atmosphere, make it less dark.

Main level should be just for passing through and meeting people. Businesses downstairs and quiet place upstairs.

make a bigger eating area

Make it a brighter.

make it a green building

Make it bigger

Make it bigger and easier to get through. TOO many people

make it bigger and more fun

make it bigger so it is not too crowded.

make it bigger so you can actually walk thru without running into someone

make it bigger with more seating

make it bigger, so it fits everybody.

Make it brighter

Make it brighter colours inside. Group things together more - like ATMs, shops, fast food, etc. Each category in one area.

Make it brighter.

Make it cheaper to run.

Make it easier to get through

Make it have more natural light....not so dark and dingy.

make it larger

-Make it larger and more like an actual food court (ie. Mac Hall @ U of C) -Fixing up all the leaks would be nice

make it larger with more tables and comfier benches

Make it larger. More TVs that shows actual TV. Maybe student productions or somethign.

Make it look a little more friendlier - I'm not going to lie, it's a rather ugly building on the inside.

Make it look less dingy - Nicer chairs, tables, etc.

Make it look nicer

Make it more bright. It looks like a subway station.

make it more modern- it looks very dated

Make it more modern looking

make it more of a food court and meeting area in lower place riel and shift everything else to upper place riel

make it more open and connected

Make it more spacious. It's really cramped during busy hours.

make it more streamlined; with clearer walking paths and less obstructions. Also the color scheme; currently it looks like a fast food restaurant

Make it more Sustainable Get rid of those Damn escalators

Make it more user friendly and less congested with student traffic

Make it more user friendly. Upper place has places to move and some places are open and are good that way, others are open and you could easily fill that space with something. Get a TD Bank machine in Place Riel.

make it much bigger

make it much brighter

make it nicer. new furniture

make it so you do not have to walk between the seating area and the food places

Make more places to hang out

Make sure the escalators work

Make sure the escalators work.

make the escalators go a little slower. how discussing the floors are.

Make the seats more comfortable. Place Riel doesn't have the sort of "ambiance" that makes me want to hang out there. If it looked more like Browsers, I would be more apt to grab something to eat and hang out there.

make the stair case up towards the tunnel a little wider and farther away from the line ups of A&W, it gets a bit congested there inbetween classes.

make traffic flow through easier during high traffic times

Maybe a few benches to sit on while waiting for the bus. or a bus shelter possibly? Also a healthier choice in foods would be great. A subway or mr sub?

Maybe more food establishments. More room for lines so that the lines don't disrupt walking traffic coming through.

Modernize the look and facilities, expand the usable areas

modernized

more area for eating

More choices and larger seating area.

more clean sitting space.

More cleanliness.

More coffee available

more comfortable atmosphere - warmer!

More comfortable places to sit and visit with friends

more comfortable seating

more comfy seats instead of those metal ones, make it look cleaner comfortable sort of thing

More commercial space

More Eating Areas

more eating space

More eating space and meeting areas

more eating space and more microwaves in lower place riel

More eating space, more couches/places to lounge

More eating space.

More eating/dining room area to sit down and eat/talk

More eco-friendly

more esthetically pleasing, more space, and stop putting the poster-sale in there! (there's not enough room)

More events in Upper Place (like the poster sales that are held).

more food

more food options - healthy, local, maybe sit down-type place  
more meeting space - open to anyone, and more space for clubs and organizations

more food places more seating

More food services that allow you to use meal plan at

more good seating area

More light (not so dark and dingy) Better architecture, more aesthetically pleasing.

More light and green spaces.

more lighting

more lights

More Microwaves

More microwaves, more plug ins for labtops. more places to sit and eat.

More natural light (more windows) and study nooks - think the Saskatoon airport but more comfortable, like Browser's. A more prominent information desk

more open space to allow traffic flow, also for waiting for bus

more options for food. More seating & more comfortable seating

More places to choose from for lunch

more places to eat beergarden (open 24/7)

more places to eat, and maybe more stores

More places to sit

More places to sit

More places to sit

More places to sit and larger entrance for waiting for the bus in the winter, or even a separate entrance for people not waiting for the bus so I don't have to fight my way through the crowd.

more places to sit and socialize/study/use wireless internet

more places to sit down

more private rooms

more quieter spaces

more relaxing

More reliable escalators. More functional doors (less of a bottle neck traffic jam). More sociable space. TUNNEL TO STM!

more restaurants, more seating areas

more room

more room for clubs

more seating

more seating

more seating

more seating

more seating

More seating area

More seating area, not necessarily for eating but also for just hanging out.

more seating everywhere

more seating in lower place and more walking room. Currentlt too crowded

more seating in lower place riel

more seating in the food court.

more seating inside and maybe newer seats to sit it.

More seating is needed for eating and general sitting around.

more seating room

More seating space, and a more central area to go for meals.

more seating space, more lighting.

more seating to eat and be able to sit down

More seating!

more seating, better placement of a stage for rallys

more seating, better transit areas so there is more room to walk through the doors

more seating, designated areas for eating, studying

More seating.

more seating. more restaurants/fast food. subway!

more seats

More seats

More seats for sitting.

more seeting room

more shops/businesses

more sitting areas for eating or hanging out

more sitting space

more space

More space for campus clubs/college societies, more eating areas, better flow of traffic, better lighting. I also think study space as suggested is an excellent idea.

More space for eating (non-commercial space)

More space for people to eat.

More space for rallies. I went through when there was a rally the other day and I barely made it through.

More space for walking; not so congested

More space in general would be nice. More eating/studying tables.

More plants! Maybe a fountain? Make it pretty...

More space to allow better traffic flow.

more space to eat in lower Place Riel.

More space to sit and eat

more space to sit, more comfortable seating.

more space to sit.

more space, it gets pretty crowded at times

more space, more businesses

More space, more rooms and more choice/flare is needed. The tacky 80's furniture? Making the food choices there to open up longer/on sundays...and...um...how about getting rid of the A&W?

More spacious, more places to sit and eat.

more stores

More student areas

More sunlight.

more table space in lower place

More tables

more tables

More tables and chairs.

more tables to sit at

more tables to sit down and do work

more tables!! and chairs!!

more windows and green space

More windows, light. Also, more seating areas

more/better/wider variety of food services?

Move it across the street - either onto Parking Lot 1, or even to the other side of College Dr.

move the bar there, get a TD bank machine

move the bus hub to in front of the PAC

Moving atm's to one central location

n/a

N/A

Needs better lighting!! The downstairs is like a cave!

Needs more seating for eating and visiting.

needs more tables so people can eat

Needs more windows, some of the grumpy staff at the tuck shop

new furnishings in upper and lower place.

New seating (its a bit old and dirty) and put all of the food places on one floor, along with seating and then put the meeting rooms etc. on the upper floor.

newer couches/chairs in the upper area, and maybe some in the lower aswell

nicer environment

NO

no

no change ,it is good and familiar to me

no complaints

No more crepe factor

No real "need" for escalators, take the stairs. If the people are disabled, take the elevator.

No.

none

not a lot

Not a thing!

Not as open.

not have seating near the entry ways, remove escalators

not much

Not Much

Not much

Not much.

Not so brown, it needs a fresh look. The floor is very drab in my opinion and it isn't very welcoming. Right now it looks like a subway station. There should be better lighting. More skylights.

not sure

Not sure.

Not sure.

nothing

Nothing

nothing

nothing

nothing

nothing

nothing

nothing

Nothing

Nothing

nothing

nothing

Nothing

nothing

nothing

nothing

nothing

Nothing

nothing

nothing

nothing

Nothing

nothing

Nothing

nothing

nothing

nothing

Nothing at this change

Nothing comes to mind

Nothing in particular.

Nothing its perfect!

nothing much

nothing much except have more room for student organizations. get rid of the coke vending machines and provide more healthy options. have more water fountains.

Nothing quit raising my tuition.

nothing really

Nothing really

nothing really

Nothing really, as there does not seem to be any problems with it

Nothing really, maybe get some more room.

Nothing really.

Nothing that I can think of.

Nothing, actually

Nothing, it has it's own unquieness compared to other universities/colleges. I wouldn't change a thing except for the fact that it is old and is in need of a renovation now.

nothing, its good the way it is

nothing, just clean it up a bit

Nothing, Place Riel is a good place on its own

Nothing, we dont need the escalators maybe

Nothing, well thats a lie, more comfortable chairs

Nothing.

Nothing.

Nothing.

Nothing. Great atmosphere!

Nothing. Why are changes being made?

offer more businesses and services

open up spaces, for hanging out... bright and cheery... new chairs

Open up the space some more, it gets very crowded

Perhaps a non fastfood option.

perhaps make it look a bit more decorative and exciting. It is kinda blah right now

Place reil is good, I would only suggest more food services

Place Reil just looks old. All that's wrong is esthetics

Place Riel needs a bigger area for people who are waiting for the bus.

placement of A & W, as line has constricted the flow of people

please stop letting imaginus park there twice a year. it is annoying and exponentially increases congestion

Possibly make it a little more open to walk through. Sometimes it gets crowded.

probably nothing

Probably nothing

Prune the trees so I don't hit my head on the branches near the curb. Thats about it

Put a subway in

Put in some more windows and lights.

put more eating areas in

Re organize lower place riel. it's confusing and laid out poorly. I think the space could be used more efficiently. There's a lot of wasted space in upper too.

redo that gross seating area downstairs.. toss some real lights on there and just clean it up. It's dingy.

remove escalators use arcade space for a better use put help centre in more central location

Remove greasy fast food places, add AT LEAST one more microwave!

Remove those annoying booths in the tunnel between lower Place Riel and the Library.

Scrap campus cove and have another food choice or two there instead

seating areas

seating availability

seating capacity

Sitting space, more of it

Size. There is limited seating.

sofa, they are too old and dirty

Somewhere with large tables would be handy.

spruce up look, cleaner more up to date

stairs

Stop hosting the poster sale in Place Riel. It disrupts traffic too much. Almost every getting on or off a bus, and many people from Residence walk through Place Riel and it's very congested during the poster sales.

Streamline traffic, provide more useful space

table area is dirty and old

Take A&W out!

take out the escalators

take out the escalators since they are an enormous energy hog.

That I would NOT smell like fast food when I leave place riel, it really has an awful and overwhelming scent. Getting rid of a&w would be a good idea. OR a better ventilation system of the sort.

that the poster sale would not be held there as it creates chaos and makes the area congested

The amount of comfortable sit down space in Lower Place, and the amount of healthy and affordable food outlets.

the amount of fast food restaurants. I think there are far too many.

the amount of space for seating

the awful food-court-like seating - have student artwork on walls, or "hall of fame" (somewhat) of current student accomplishments and initiative. - get rid of the escalators, they are not energy efficient, and people will get more exercise without them

The brightness level. It seems very dark.

the chairs in upper place riel--they are really dirty looking

The color The tables and chairs The floor The whole design

the colors

The colors and flooring should be updated. It's not exactly easy on the eyes. Make it more open - some things seem too tucked away.

the colour and layout

The colour scheme, can we please go with something classic this time and not something that is going to be so easily dated as pastels?

the colours, it needs brightness

The darkness... and the grunge

The decor is dated--more open space/natural light would be nice.

Also, eating establishments that serve fresh, healthy food.

the design is dark and dated and its mostly just a traffic space, that is, its primary function is as a passageway to other places. there should be more space for people to sit down.

the design, and make it larger. Gets a little crowded.

the dingy basement without any space to sit; the dingy upstairs without any place to sit.

the doorway waiting for the bus.

-the eating space in lower place could be bigger. -Get rid of a & w, Make the place more healthier.

the escalators breaking down all the time

the escalators do not work properly

The esthetic. It's rather ugly in layout. And there's nowhere for students to meet, eat, and bond.

THE FLOORING NEEDS UPDATING!, lighten the place up with more lights/windows, paint the walls a nicer welcoming color, play louder music in lower place riel, have local bands play every so often in lower place riel,

the flow of people through it and the atmosphere, it looks like a bus stop and i think it should be more welcoming and friendly, a more leisurely atmosphere

The front doors are not very inviting

the interior design, it looks old and run down

The kiosk at the bottom of escalators is used by pi-throw which I've helped coordinate, however it's set up doesn't really target people traveling in either direction due to orientation, a better set up would allow for better targeted advertising.

the lighting

the lighting

the lighting

the lighting

The lighting in Lower Place is shitty (like a dungeon). The seating is uncomfortable. The escalators are a waste of fossil fuels.

the look

The name

The number one thing is the area for eating...there are not nearly enough spaces to sit. I also think it needs to be updated. It feels old and dingy in there.

The seating and cleanliness. No more money wasted on plasma screens.

The seating and furniture, there is not enough space for students to hang out, and the lighting. It's too dark.

The seating in Upper Place. Make it easier to get in and out when the buses are coming around the loop. Especially for those freezing cold days.

the seating is uncomfortable

The seating. Make more seats using smaller chairs, by taking away the big old chairs, making the new chairs like the one in lower place riel so ppl can eat and study!

the seats and cushions are old and tattered change them

The seats at the front door could sure use a cleaning!

the smell of fast food and the acoustics (too loud)

The tables and chairs, that island at the bottom of the stairs is useless.

The tile maybe...the current tile is very dark, makes Place Riel also dark

The traffic patterns! There is always a huge traffic straight that separates Lower Place's eating area from food services.

The way it looks... it's kinda boring... needs some color and more and cooler seating in lower place... more food choices... another Tim Horton's or a subway

The way traffic flows.

there is a lot of dead space in upper place. I might incorporate a waiting room for the buses so that the front doors aren't always blocked

There need to be a way to deal with such a high volume of traffic.

Those ugly fucking brown tiles, more seating area, get rid of all those flatscreen tvs showing the USSU people.

to add more spaces for student to eat and sit especially in noon.

too crowded. When the buses come in, it's impossible to move through Upper Place.

traffic

traffic flow and make it more sustainable.

unsure

update

Update it is what it needs. Expand it, clean it up, bring it up to the present. There's no need for half finished hallways and doors through a main gateway of the university.

update it, it looks very dark and out of date, more windows

update the decor, add more space for people to sit and eat/hang out

Update the look of Place Riel.

update the look. more commercial areas, especially food options.

more environmental

Update the seats, they are really dinghy

update the tacky decor, and make it easier to get around (in lower place, at class change time, it is impossible to get anywhere quickly

Updated, more sitting areas.

upper place should be redecorated or something it is not very welcoming, it would be better if there were more comfortable places to sit, especially for people waiting for the bus, or having a break between class

Usually quite dirty, which i understand with the amount of traffic.

What I would surely do is cancel that poster sale which makes it miserable trying to get through there, or find anywhere to sit.

Walking through there at a busy time, such as lunch, can be a hassel because of all the people.

well.....more places for eating, softer atmosphere.

WHEN DOING THE POSTER GALLERY I WOULD NOT HAVE IT IN UPPER PLACE IT IS WAY TO CROWDED MAKES IT HARD TO MOVE AROUND. I WOULD HAVE ALL THE FOOD PLACES LOCATED IN LOWER PLACE

where the sitting areas are, and where ppl stand when waiting for the buses

Working escalators.

Would like to see improved traffic flow, and the ability to open all the doors.

Would update the look of the decor, such as seating (stains on many of the seats), have more seating.
